

Environmental Management Policy

SK D&D aims to contribute to the expansion of sustainable space development, thereby assisting in national greenhouse gas reduction and creating social value. In line with the national goal of achieving carbon neutrality by 2050, through the distribution of eco-friendly buildings in the construction sector, addressing supply chain issues, and the importance of energy security, we plan to diversify our business structure from one centered on development and operations to one focused on customer-oriented product development and expanding into the solutions market.

SK D&D systematically manages environmental management activities by establishment and internalization of management infrastructure to minimize environmental risks and raise the level of environmental management while striving to expand eco-friendly businesses.

- ① SK D&D proactively moves forward to tackle the climate crisis.
- ② SK D&D officially endorses and proactively applies international environmental declarations, standards and norms.
- ③ SK D&D pursues continuous innovation across its entire business operations to provide eco-friendly products and services.
- ④ SK D&D transparently discloses environmental management information to stakeholders in conformity with global standards.
- ⑤ SK D&D strives to minimize any adverse environmental impacts that may stem from its business operations.
- ⑥ SK D&D continuously advances its environmental management strategy and implementation system.
- ⑦ SK D&D endeavors to abide by environmental laws and regulations and establish a culture of environmental management.
